How to find a journal article
Looking for this article

Click on "Full text access".
1. Check the date for availability.
2. Click on the database ("Academic Search Premier").

Refer to How to save a PDF document (at the HOW TO tab).

Read the document, or download.
Search with the journal title.

Step 2: If you couldn't find the electronic article on the A-Z list, search on the catalogue for the printed journal.
Find the printed journal in the Library, and make copies of the article or scan it. If you are not in Potchefstroom, you may request it to be scanned and e-mailed to you.
